

Access on-demand, high-quality, and affordable care with virtual visits

[Health System Name] is happy to announce that we've partnered with KeyCare to provide telehealth services – or virtual visits - to our patients for urgent but minor illnesses and routine ailments.

Virtual visits, or telehealth is a way to receive medical care from your care team without an in-person office visit. Patients can be at home, the office, or anywhere else and receive telehealth services, via the internet using their computer, tablet, or smartphone.

Powered by

KeyCare

Telehealth is a great option to treat a wide range of minor, routine medical issues, including:

- allergies,
- back pain,
- bites or stings,
- coughs,
- colds,
- fevers,
- flus,
- burns (minor),
- headaches,
- constipation,
- nausea,
- vomiting,
- pink eye,
- sinus problems,
- sore throats,
- sprains and strains,
- urinary tract infections, and
- tooth pain

How to access Virtual Visits on [health system name]

You can access telehealth virtual visits in the same way you schedule in-office visits, either through MyChart on your computer, on a smartphone, or through [Health System Name's] call center. All you need is a computer, tablet, or smartphone to initiate the visit. You won't have to create any new sign-ons or download additional apps.
